

### CUSHIONS THAT ROCK

The **softest stone** you'll sit on this year could be South African designer Ronél Jordaan's rock cushions, made with a traditional felt material (100% cotton). Jordaan also creates rugs, throws and wall hangings. Even more importantly, her materials and dyes are eco-friendly, and she's trained more than 40 previously unemployed women to become professional felters.

### NOT JUST "A" BIRDHOUSE

These **3-D wooden** alphabets and numbers are sleek and modern, and they double as birdhouses. Mumbai-based artist Nishant Jethi designed and created the hollow, wooden nameplates and house numbers as alternative homes for nearby sparrows losing their dwellings to new construction. ■

### PORTABLE PAC-MAN

**Pac-Man has been** on T-shirts, hats and posters, but it's never been the subject of a luxury watch – until now. Swiss-based company Romain Jerome is producing four different limited-edition styles, with only 20 in each style, inspired by one of the world's most recognizable video games.
